

KRISH CHAUDHARI

Pune, Maharashtra | +91-8830480740 | krishchaudharihere@gmail.com | LinkedIn | GitHub | Portfolio

Education

RMD Sinhgad School of Engineering, Pune

Aug 2023 – June 2026

B.E. in Computer Engineering | CGPA: 8.69/10

MET Bhujbal Knowledge City

Aug 2020 – July 2023

Diploma in Computer Engineering | 86.69%

Technical Skills

Languages: JavaScript (ES6+), Java, Python

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Cloud: Docker, AWS (EC2, ECS Fargate, S3), CI/CD (Jenkins), Linux

Tools: Git, GitHub, Postman, NPM

Experience

Frontend Web Developer Intern – Coding Savvy

Dec 2024 – Jan 2025

Project: ISKCON IT Cell – Volunteer Task Allocation System

- Built reusable React.js components for responsive dashboard and task allocation UI; integrated REST APIs for frontend-backend communication
- Used Git branching and pull requests for collaborative development and deployment coordination in a team environment

Projects

ResumeSmart AI Agent | React.js, Node.js, Express.js, PostgreSQL, Docker, AWS EC2, LLM Integration

- Built full-stack AI career analysis tool that parses resumes through an LLM pipeline to deliver role recommendations and skill gap analysis; deployed on AWS EC2 with Docker
- Engineered prompt design and response formatting for consistent structured LLM output across three containerized Docker services

PulseHR – Employee Leave Management System | React.js, Node.js, Express.js, PostgreSQL, JWT, Docker

- Built role-based HR system with admin and employee workflows, JWT authentication, protected API routes, and leave balance tracking
- Designed PostgreSQL schema and backend APIs to maintain data consistency across leave requests, approvals, and balance updates

FinTrack – Finance Tracker | React.js, Node.js, Express.js, MySQL, Docker, REST APIs

- Built full-stack finance tracker with real-time income/expense dashboard, category-based filtering, and REST API backend
- Designed MySQL schema and containerized frontend, backend, and database as separate Docker services for consistent deployment

CI/CD Pipeline – Jenkins & Docker | Jenkins, Docker, Django, CI/CD

- Automated build-test-deploy pipeline using Jenkins and Docker — detects push, runs tests, builds image, and deploys container with staged failure handling
- Configured Jenkinsfile with sequential stages ensuring test must pass before build, and build before deploy

Certifications

Enterprise Grade Artificial Intelligence – IBM | Programming in Java – NPTEL | Cloud Computing – Microsoft | Operating Systems – NPTEL
